ABOUT US

Goher Steel Industrial (GSI) is an Egyptian engineering, manufacturing, and contracting company established in 1992, specializing in Pre-Engineered Steel Buildings (PEB) and Structural Steel Solutions

With extensive experience in the steel industry, GSI delivers integrated solutions covering engineering design, fabrication, and construction of a wide range of steel structures including industrial plants, factories, workshops, warehouses, crane systems, multi-span and multi-story buildings, and bridges

Our approach combines engineering expertise, advanced manufacturing capabilities, and a commitment to quality to deliver reliable, efficient, and customized steel solutions that meet the evolving needs of our clients

From concept and design to fabrication and installation, GSI is committed to transforming ideas into durable structures built to perform

OUR VISION

To become a leading name in the steel construction industry, recognized for engineering excellence, manufacturing capabilities, innovation, and delivering reliable steel solutions that contribute to the development of modern infrastructure and industrial facilities

OUR MISSION

To provide integrated engineering, manufacturing, and construction solutions through high-quality steel products, innovative technologies, and professional expertise, while maintaining our commitment to safety, efficiency, customer satisfaction, and continuous improvement

OUR GOALS

- Deliver high-quality steel structures that meet project requirements and specifications
- Continuously enhance our engineering and manufacturing capabilities
- Improve production efficiency and project delivery timelines
- Develop innovative and cost-effective steel construction solutions
- Build long-term partnerships based on trust and reliability
- Maintain consistent quality throughout every stage of project execution
- Expand our presence across local and regional markets

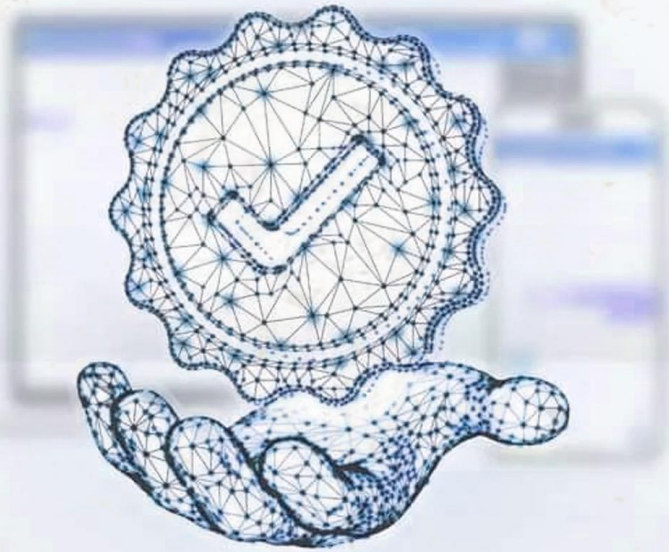

QUALITY ASSURANCE

At Goher Steel Industrial, quality is an essential part of our engineering and manufacturing process

We focus on maintaining quality throughout every project stage, from material selection and engineering design to fabrication, inspection, and installation

Our quality approach includes

- Material Inspection
- Production Quality Control
- Dimensional & Technical Inspection
- Welding Inspection
- Surface Preparation & Coating Inspection
- Final Product Inspection
- Third-party NDT - Non Destructive Testing

Through systematic quality monitoring and continuous improvement we aim to deliver steel products and structures that meet the required technical specifications and client expectations

جوهر للصناعات المعدنية
GOHER STEEL INDUSTRIAL
SINCE 1992

OUR SERVICES

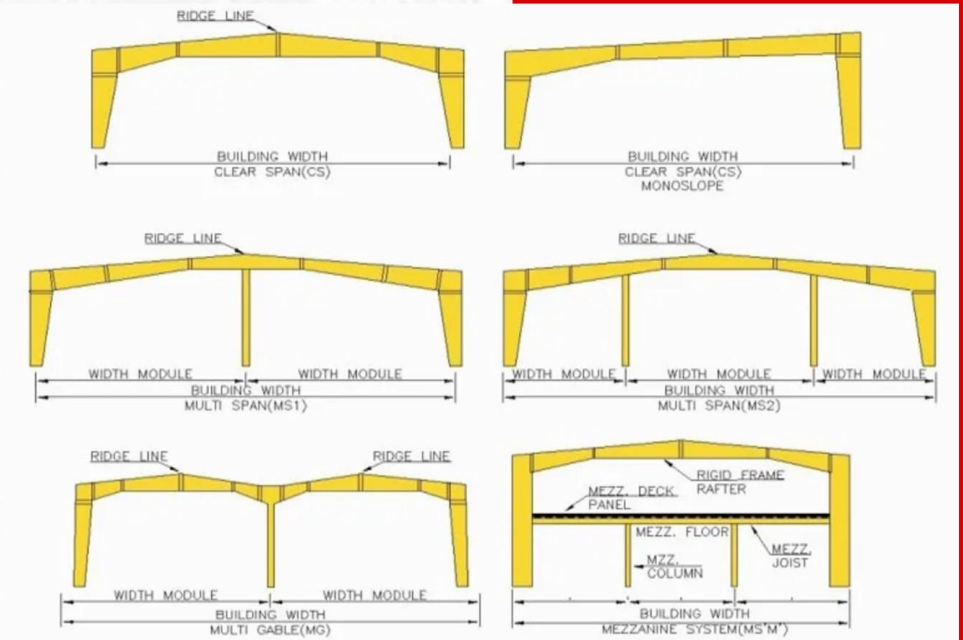

- Engineering & Design

Providing comprehensive engineering solutions, including structural analysis, detailed engineering drawings, design calculations, and shop drawings to ensure accuracy, efficiency, and project compliance

- Pre-Engineered Steel Buildings PEB

Designing and constructing customized steel buildings for industrial, commercial, and storage applications, with flexible structural configurations to meet different project requirements

- Structural Steel Fabrication

Manufacturing structural steel components and assemblies with a focus on precision, durability, and consistent production quality

- Steel Erection & Installation

Providing professional on-site steel erection and installation services, ensuring proper assembly, structural alignment, and efficient project execution

- Industrial Buildings & Warehouses

,Developing steel structures for factories, production facilities industrial workshops, and large-scale warehouses

- Cranes & Specialized Steel Structures

Engineering and fabricating steel structures designed to support crane systems and specialized industrial applications

- Multi-Story Buildings & Bridges

Delivering engineered steel solutions for multi-story structures, bridges, and complex steel construction projects

GSI
جوهر للصناعات المعدنية
GOHER STEEL INDUSTRIAL
SINCE 1992

OUR PRODUCTS

- Pre-Engineered Buildings PEB

- Industrial Buildings
- Commercial Buildings
- Steel Warehouses
- Workshops & Factories
- Multi-Span Buildings
- Multi-Story Steel Buildings

- Roof & Wall Panels

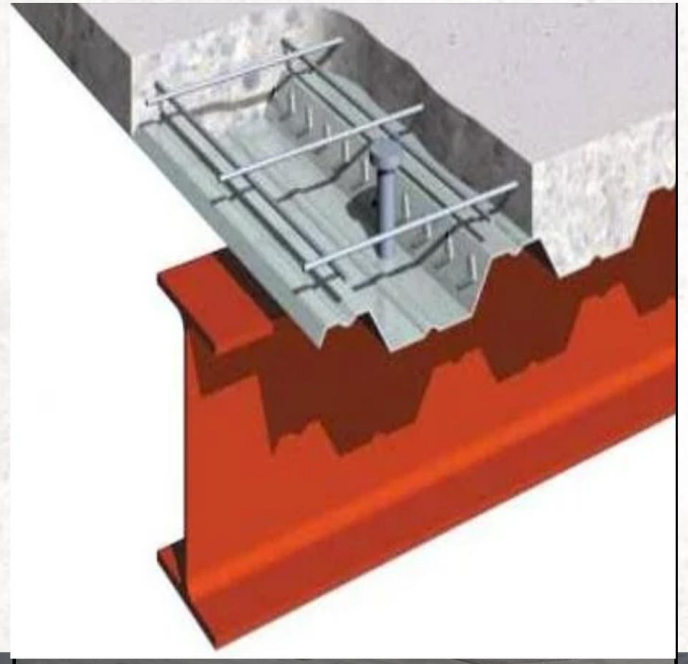

- Single Skin Panels
- Insulated Sandwich Panels
- Roof Cladding Systems
- Wall Cladding Systems

- Panel Accessories

- Z Purlins
- C Girts
- Louvers
- Flashings & Trims
- Panel Fixing Accessories

- Steel Joists & Decks

- Steel Joists
- Steel Decks
- Hambro Floor Systems

- Structural Steel Components

- Primary Framing
- Secondary Framing
- Steel Columns & Beams
- Customized Structural Components

Additional Workshop

Client
Egyptian National Railways

Location
Minya – Egypt

Project Scope
Design, Fabrication, and Erection of Steel Structure for the Additional Workshop

OUR PROJECTS

Imbaba Railway Station

Storage & Train Preparation Workshop

Client
Egyptian National Railways

Location
Imbaba – Egypt

Project Scope
Design, Fabrication, and Erection
& of Steel Structure for the Storage
Train Preparation Workshop

RESEARCH & DEVELOPMENT

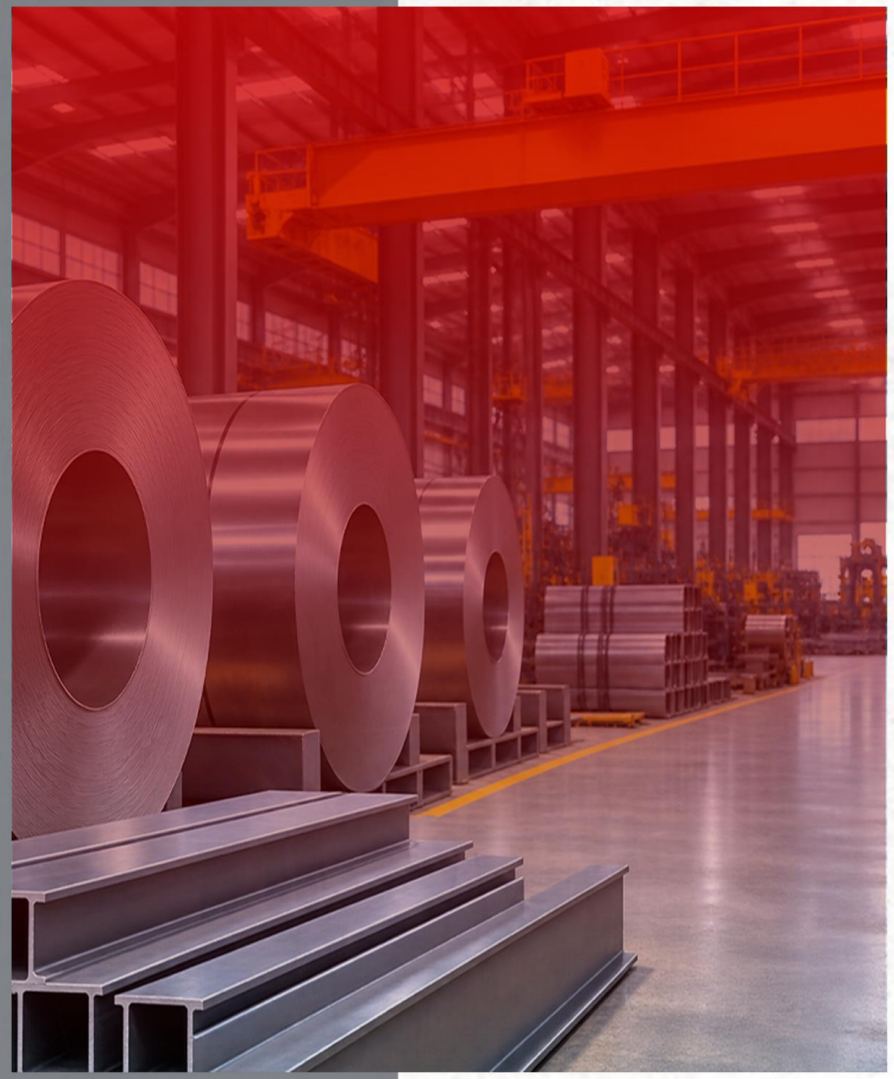

We believe that continuous development is essential to maintaining competitiveness in the steel industry

At GSI, we focus on enhancing our engineering methods, exploring innovative structural solutions, and improving manufacturing processes to achieve better efficiency, performance, and value

Our development priorities include

- Improving structural design and engineering efficiency
- Exploring innovative steel construction solutions
- Enhancing manufacturing processes
- Optimizing material utilization
- Developing technical capabilities and professional expertise

WHY CHOOSE GSI

Experience Since 1992

Over three decades of experience in the engineering and steel construction industry

Integrated Solutions

From engineering and design to manufacturing and on-site installation

Engineering Expertise

Professional engineering capabilities focused on practical, efficient, and reliable solutions

Quality Commitment

Attention to quality throughout design, production, and project execution

Customized Solutions

Steel structures engineered to meet the specific requirements of each project

Efficient Project Execution

A performance-driven approach focused on planning, coordination, and timely delivery

Continuous Development

Commitment to improving production methods, technical capabilities and engineering processes

Long-Term Partnerships

Building lasting relationships through professionalism, reliability, and customer satisfaction

OUR CLIENTS

At Goher Steel Industrial, we value every partnership we build. We work closely with our clients to understand their project requirements and deliver steel solutions that support their operational and business objectives

Our commitment is to establish lasting relationships built on trust, professional collaboration, quality, and reliable project execution

Our clients include

- Industrial & Manufacturing Companies
- Construction & Contracting Companies
- Real Estate Developers
- Commercial & Logistics Businesses
- Private & Public Sector Organizations
